Street Smart Features of all our Pedals

- No POT's to adjust---Total control using your foot
- Different Color LED for each setting gives quick indication
- Depend on your settings—they are always repeatable
- Always powers up into a low power bypass mode
- Long Battery life or use 6-12vdc external power
- Led flashes slowly when 20 hours of battery life remain
- Led flashes fast when 4 hours of battery life remain
- Locks to other Lock and Rock pedals-forget pedal boards

\$279

Are you looking for that sweet natural boost that lets you keep your tone? Keep that transparent sound or use the Harmonic Modifier for that extra chime. You get five boost settings 5, 8, 11, 14, and 17db. A very useable distortion pedal! Plus, hold down the Top switch for three seconds and your current settings are saved as the power up default setting. You get 11 different distortion level settings plus tones.

Right switch increases boost, Left switch decreases boost
 If at UNITY setting Decrease switch rolls to highest boost
 If at highest boost Increase switch rolls to UNITY setting
 Independently set boost level for Harmonic Modifier
 Can change Harmonic Modifier to be extra 8db boost level
 Hold down the Right switch 3 seconds get a 14 db mute
 Hold down the Left switch 3 seconds get a 28 db mute

Switches can Control Distortion and Tone
 Independently set Drive (amount of distortion) and Tone
 Top LED slow flash indicates switches controlling Tone
 Top LED fast flash indicates switches controlling distortion
 Ten Tone settings--add bass or treble, midrange cut/boost
 Hold the Right switch 2 seconds switches control distortion
 Hold the Left switch 2 seconds switches control Tone
